Approved For Release 2000/08/27 : CIA-RDP75-00662R000100020084-0

MEMORANDUM TO: Chief Chemical Officer  
THRU: AD of S, G-4

FROM : AD/BI & MR (Joint)

SUBJECT : Technical Liaison

"Suggested Letter"

1. The professional staff of this Agency must rely heavily on the knowledge and experience of the individual Scientists of the Technical Services to provide on a continuous basis, advice on the advances and status of research, development, production and engineering within the scope of each Service. This professional advice will permit CIA to properly evaluate Intelligence information and to supply intelligence data within its assigned mission. It will permit CIA to be conversant with comparable research and production problems in the U.S.

2. This Agency realizes that indiscriminate visitation could result in inconvenience and interference with the work of the cooperating agency personnel. It is, therefore, proposed that within CIA Contact Officers be designated to collect and coordinate the Agency's requirements for technical advice; these individuals will be solely responsible to contact Chemical Corps personnel on CEBAR projects. These Contact Officers will be certified to various installations of the Chemical Corps as holding "TOP SECRET" clearance and authorized to discuss all CEBAR research and engineering.

3. It is further proposed that these Contact Officers be designated to act for the Agency for a period ending 31 December 1952 and be permitted to visit freely within the Chemical Corps installations by making direct arrangements with the following offices:

Office of Chief Chemical Officer	- Washington, D. C.
Camp Detrick	- Technical Headquarters
Army Chemical Center	- R & E Staff, E.A.
Other Installations	- R & E Staff, Washington

4. The following individuals are hereby designated to serve as Chemical Corps Contact Officers for CIA:

<u>OSI</u>	25X1A9a	<u>ONR</u>	25X1A9a
(Principle)	[REDACTED]	(Principle)	[REDACTED]
(Alternate)	[REDACTED]	(Alternate)	[REDACTED]

25X1A9a  
5. This proposal has been discussed with Brig. Gen. C. A. Loucks, Deputy Chemical Officer, by [REDACTED] of the Office of Scientific Intelligence, CIA, and has been approved in principle. It is further agreed that no data which may be obtained thru these consultations will be included in any CIA intelligence production efforts without prior coordination through established intelligence channels.

ROBERT AMORY, JR.  
Assistant Director, ONR

H. MARSHALL CHADWELL  
Assistant Director, SI
